

## Recycling

At our construction projects throughout the Metro Atlanta area we provide separate containers for specific recycled materials and construction waste. Throughout the course of our projects we noticed tenants were disposing of their unused office equipment in our waste containers. This is not the best practice for discarding these type materials. To respond to the need for a more environmentally acceptable solution we offer Office Equipment Recycling Days at locations of our construction projects and encourage all to add to this effort.

During our Recycling Days we collect unused office equipment from building tenants and deliver these items to Molam International in Marietta, GA for environmentally safe recycling. You can find out more about the services of Molam International at [www.molam.net](http://www.molam.net).

We are committed to practical solutions for protecting our natural resources.
